

Highway 4 To Remain Open to Business and Locals During Construction

Highway 4 east of Roller Bypass Road will close to traffic travelling west from Murphys as construction on the final link from Highway 4 to the new Bypass is completed.

As part of the original construction plans, and to insure the safety to motorists and workers, the contractor is required to close Highway 4 to through traffic once the new bypass is open on July 22, 2009.

To correct the fifteen (15) foot difference in elevation between Highway 4 and the new Bypass, the Contractor will grade and fill the surrounding landscape. To complete this work, crews must close Highway 4 to through traffic while allowing business and local traffic access. Highway 4 will be closed just east of the Stelte Park entrance. Business and local traffic will have access past this point, but will not have access to Murphys.

It is expected that construction of this connector will be completed within 4 weeks of the start date.
